## BIOMEDICAL ENGINEER

### Executive Summary

I am a student of biomedical engineering at the last year of master's degree in medical informatics, the course has provided me tools to use my skills in the extracurricular activities in which I am involved.

### Areas of Expertise

•Bases of programming: PYTHON, JavaScript  
• Machine Learning, Deep Learning, Neural Networks and Artificial Intelligence.  
Tools and Frameworks: TensorFlow, Keras, DJANGO, NumPy, SciPy, scikit-learn, pandas, PyTorch, Seaborn.

### Reach me at:

Email: angelasofiamg@gmail.com  
Phone Number: +351 911180938

From: Braga

### Observations:

Languages: Portuguese, English  
Drive Lincense

### Work Experience

#### STUDENT WORKER

2012 - 2019

- Works from waitress to receptionist, in local restaurants and in big chains like PizzaHut.

#### TRAINEE

July, 2019 - December, 2019

- Working on data science and neural networks at YARILABS , Braga

### Education & Formation

#### UNIVERSITY OF MINHO

2014-Present

-Degree in Biomedical Engineering.

-Last year of master degree in Medical Informatics.

Working on thesis theme "Multi-task head network for bounding box Regression and Object Class Prediction"

-Ex-Volunteer at TecMinho.

#### OTHER ACTIVITIES

April 2017 - September 2017

-Volunteer at Braga Hospital.

October 2017 - Present

-Member of non-profitable organization #include <braga>

August 2015 - Present

-Member of cultural and recreational association. "Mocidade dos Anjos"
